Preparation

Note: These dimensions and templates assume a door thickness of 1.5 mil. For doors of other thickness, consult factory.

Installation

1. Remove the back-up plate from the back of the device and install the device on the door.
2. Secure the plate to the door using the supplied screws.
3. Align the device with the latch and strike plate and install the screws to secure the device.
4. For cutout dimensions for wood and hollow metal doors, see the opposite side of this installation sheet.

Product must be installed according to all applicable building and life safety codes.

3300 Fire Rated Exit Device
For Hollow Metal Doors
