Press Release

FOR IMMEDIATE RELEASE – September 12, 2016

Adams Rite Introduces Two Exit Devices Requiring Only 5 lbs of Activation Force at ASIS 2016

ORLANDO, FL – At ASIS 2016, Adams Rite, an ASSA ABLOY Group company, is highlighting its 8600 Series CVR and 8800 Series rim exit devices that will feature a new, lower activation force to comply with the California Building Code. An 8800 rim exit device will be on display in the ASSA ABLOY booth #3601 at the Orlando Convention Center, September 12-15, 2016.

The 8600 Series concealed vertical rod (CVR) exit device and the 8800 Series rim exit device from Adams Rite recently passed UL testing and will be available later this year with 5 lbs. maximum activation force. This new activation force complies with the 2013 California Building Code (CBC) that requires hardware to operate with maximum 5 pounds of force, for safe yet secure door hardware operation. These exit devices are ideal for healthcare, hospitality, education, commercial, and retail applications.

“Updating the 8600 and 8800 exit devices with a lower activation force not only meets new building codes in California – but it also provides an important option for facilities that require ADA compliance, offering door hardware that’s appropriately operable,” said Heather Goldman, Senior Product Manager, Adams Rite, ASSA ABLOY. “As always, it’s important to consult your local AHJ or code officials before beginning a project to determine standards and code requirements.”

ABOUT ADAMS RITE

ASSA ABLOY ASIS Booth #3601
