Press Release

FOR IMMEDIATE RELEASE

STEEL HAWK 4300: THE ADAMS RITE NON-HANDED ELECTRIFIED LATCH

LAS VEGAS, NV, April 10, 2013 – Back in full force at ISC West, Adams Rite, an ASSA ABLOY Group company, is showcasing its easy-to-install electrified latch for aluminium entrance doors, the Steel Hawk 4300.

The latch features a patented two-way winged technology and interfaces with existing Adams Rite handles, paddles and the new 4600 Designer Series Handles, right out of the box. It is constructed from steel with stainless steel latch bolts and can replace the 4900/4500/4700 Series dead latches using the same strike and adapting to 12, 16 and 24 volts DC, meeting ANSI/BHMA Grade 1 requirements.

The system requires no cutting or drilling and takes about 15 minutes to install or retrofit. It is the easiest way to electrify an aluminum entrance door. The Steel Hawk 4300 is rated for continuous duty and is also available with Smart Monitoring, which provides an electrical indication when the latch bolt is fully extended, and in a secure state.

For more information about the Steel Hawk 4300, please visit www.steel-hawk.com.

ABOUT ADAMS RITE

Over 115 years old, Adams Rite Manufacturing Co., an ASSA ABLOY Group company, designs, manufactures and markets door and door hardware products to the commercial, industrial and institutional building construction industry and is recognized as one of the leading suppliers in its area of specialization. Adams Rite develops products that are designed to complement the clean lines of modern doors, while at the same time meeting safety and access codes. The main headquarters is located in a 94,000 square foot building in the city of Pomona in Southern California. Visit their website at www.adamsrite.com.
